

1980 Census of Population and Housing Special Tabulations for New Mexico Tumor Registry. Technical Documentation

D1-D80-STPX-14-TECHNM

Note: This technical documentation was issued at same time as the corresponding data file and does not necessarily reflect changes to the data file that may have been made later. We offer it as a service to our customers who have purchased the file, but we do not in general offer technical support for past data files. Note that although the documentation may refer to data on tape, the U.S. Census Bureau no longer releases data on magnetic tape; customers purchasing files previously released on tape will receive the file in ASCII on CD-ROM. For information about this and other technical documentation, please contact the Customer Services Center at 301-763-INFO (4636).

Additionally, Census Bureau organization, telephone numbers, and staff cited in this technical documentation are not current. For updated information, see our Telephone Contacts site at <<http://www.census.gov/contacts/www/contacts.html>> or Staff Search at <<http://www.census.gov/cgi-bin/main/email.cgi>>.

Technical Documentation

Census of Population and Housing; 1980:
Special Tabulation for New Mexico Tumor Registry
(100 Percent and Sample)

Prepared by:
Gordon Lister
Population Division
Bureau of the Census
301-763-5060

April 1985

100 Percent--American Indian

For each geographic area there will be a one logical record, composed of two 2,046 character physical records. The first physical record will contain 252 characters reserved for geography and control information in the initial positions. The remainder of the first record contains 199 data fields (nine characters each) and a three character "fill." The second physical record repeats the first 102 characters of geography, followed by 28 data fields (nine characters each) to complete the required data. The remainder of this record contains "fill" characters.

The areas present on the tape are a subset of the same areas, in the same sequence, as summarized for the 1980 Decennial Census Summary Tape File 1A (STF1A). The STF1 Technical Documentation describes the geography positions and the geographic content of each record, except the fields described as suppression flags. Only one suppression flag is applicable and will be set in position 205 of the first physical record. If this flag is set to "1," the initial 226 data fields in the record will be suppressed, that is, set to zero; otherwise, all data will be present for the area summary.

The areas present on the STF1A file, but not on this file, are those which have no American Indians.

The 227 data fields are described below:

1. AGE (113) BY SEX (2) 226

Universe: American Indians

Under 1 year:

Male

Female

1 year:

(Repeat Sex)

2 years:

.

.

.

.

111 years:

(Repeat Sex)

112 years and over:

(Repeat Sex)

2. RACE (1) 1

Universe: American Indians

Sample--American Indians

Two geographic areas are summarized. There will be a complete summary present for the state and each county within the state in ascending county code sequence. The logical record for each area will contain 80,908 data cells. The summary will be divided into 375 physical records of 2,046 characters. The first 252 characters of the initial record contain geographic or control information; the remainder of the record contains 199 data fields (nine characters each) and a three character "fill." The next 373 records each repeat the first 102 geographic characters and contain 216 data fields. The final physical record (375) contains the 102 geographic characters, 141 data fields and the remainder is "fill."

One suppression flag is applicable and will be set in position 205 of the first physical record. If this flag is set to 1, the 80,908 data fields will be suppressed, that is set to zero; otherwise, all data will be present for the area summary.

The geographic content of each record will be as described for the 100 percent data at state and county level.

The sample data is initially tabulated in three matrices. Each matrix tabulates a portion of the American Indian population, based on the reported tribal code. Only 179 of the tribal codes are tabulated. These are the codes present in the data for either New Mexico and/or Arizona. The Population Division will provide a name for each of the tabulated tribal codes. When the data are converted to an external file, these matrices are concatenated into consecutive positions.

MATRIX

1 AGE (113) BY SEX (2) BY AMERICAN INDIAN TRIBE (60) BY SPANISH SURNAME (2) 27,120

Universe: American Indians In Tribes 1-60.
